

How to Access Alio

- Download and install the latest version of Java from: <http://www.java.com>
- Download your preferred version of Alio from one of the links below this walkthrough. The “button” and “tree” styles have differing layouts, but the exact same functionality. Download the file. This will be how you access Alio.
 - If prompted by your browser, be sure to click “Keep”:

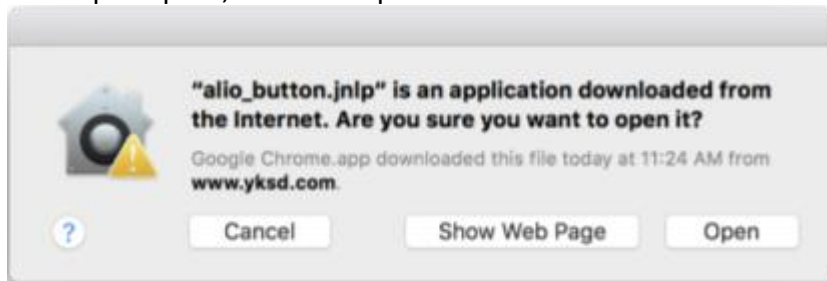

- Navigate to your downloads repository and find the .jnlp file you just downloaded. Feel free to move this file to your desktop or somewhere more conveniently accessible – you only need to download this file once, and can continue using this same file to access Alio whenever you need to.

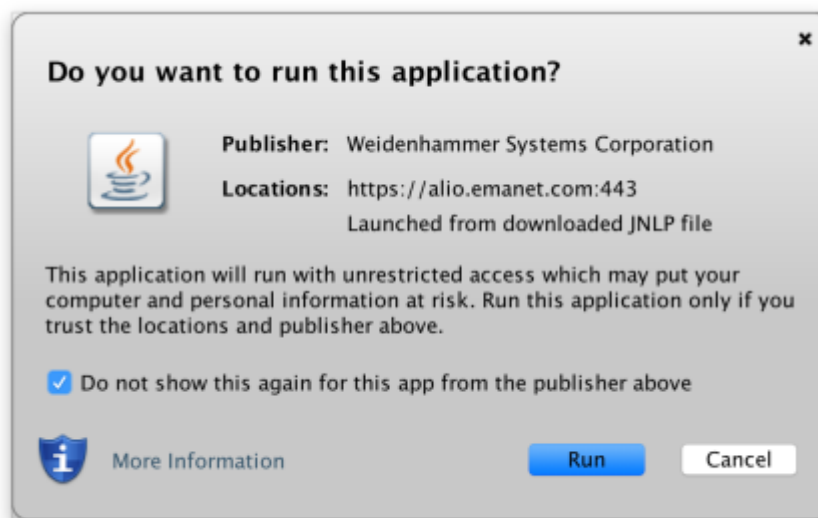

alio_button.jnlp

- Double click on the .jnlp file.
- When prompted, click on “Open”

- A second prompt will appear. Click the checkbox for “Do not show this again for this app from the publisher above” to avoid this window in future. Click Run.

- In addition to the usual Alio window, here will be a second application window open titled “!!!DO NOT CLOSE THIS WINDOW!!!” You can safely close this window when you are finished with Alio.
- Please [open a support ticket](#) if you have issues reaching Alio.
