21 March 2020

Dear YKSD Families,

Please note that while school facilities are closed until May 1, 2020 due to the health mandate, YKSD has been planning for long-term closure and will be providing instructional activities and learning packets. Additional reading materials and resources will be provided to each family. We are exploring other delivery options for distance education and will continue to provide food services.

Since closing, YKSD staff members have been in regular communication via videoconferencing and are working to ensure that the district is equipped to continue providing a quality education. The district is also exploring other options to support this learning process and is currently conducting a household internet survey. Please ensure that this is completed.

I am very grateful for the support and strong leadership exhibited by our Regional School Board during this pandemic. I further appreciate the work of the staff and the manner in which each member has pulled together and is working to ensure that our students' education is prioritized. During this time of uncertainty, I have received significant input from Village Councils and many local authorities. I would like to thank everyone for their input and for sharing ideas to help navigate this situation.

I will continue providing regular updates on our website as well as via Facebook, Twitter, and Instagram. Together, we will get through this. As always, we remain #AlaskaStrong.

Sincerely,

Kerry Boyd,
Yukon Koyukuk School District
